

PRODUCTIONS UNLIMITED, INC.

**Tbox**  
*Lighting Position*

## About Tbox

The Tbox Lighting Position from Productions Unlimited, Inc. provides a recessed lighting position in spaces with a suspended ceiling. An attractive solution for classrooms, conference rooms, dance studios, cafeteriums, and other spaces that have suspended ceilings. It provides a secure lighting position which is supported by the structure above, rather than placing the load on the ceiling grid itself. Adjustable length suspension cables are supplied in a size appropriate for the distance between the structure and the ceiling grid. Other custom solutions for suspending the unit are available as well.

- Custom wiring for either one or two circuits with any of a number of power connectors, including both outputs and throughputs, are available.
- Standard size ceiling tile layouts of 2x2 ft and 2x4 ft, with custom sizes for larger or smaller grids or even hard ceilings are available.
- DMX control may be provided as a single output or may include a throughput as well.
- Connector options may be mounted in either the top or side of the box.
- Pipe or strut options are available for fixture mounting.
- Standard powder coat colors are white and black. Other colors are available.

### **WARNING:**

The Tbox **MUST** be suspended from the building structure with the supplied suspension cables or other means. The unit is **NOT** designed to be supported by the ceiling grid.
